Abstract (en)  
[origin: WO2013182849A1] A contact lens case (10) includes a base (12) and a lid (14). The base (12) includes at least one receiving channel (12L, 12R) adapted to receive at least one removable container (50). The lid (14) includes a rim (17) that extends towards the base (12). The lid (14) and rim (17) are shaped to enclose the container (50) when the lid (14) is closed against the base (12). The lid (14) also includes a sealing element (15) on its inside surface. The sealing element (15) is configured to engage with an area of the container (50) such that an airtight seal is achieved when the lid (14) is closed against the base (12).
