Abstract (en)  
[origin: WO2013182802A1] The present invention relates to a lateral direction indicator for vehicle comprising a flashing light source (3) and a concentrator (5) of light rays (4), said light source (3) and said concentrator (5) being disposed behind an output screen (7), characterized in that it comprises:- a hood (6) surrounding said light source (3) and comprising an aperture (11) allowing a fraction of the light rays (4) emitted by said light source (3) to pass through it and to be converted by said concentrator (5) into a light beam which will illuminate a zone of projection of said output screen (7), and - means for rotating said hood (6) in relation to a vertical axis coinciding with or parallel to the axis of said light source (3), so that said projection zone moves laterally on said output screen (7).
