Abstract (en)
[origin: WO2013186095A1] The invention relates to a structure for an underwater vehicle, which comprises a thick hull (1) that is, over at least a portion of the length thereof, generally cylindrical, and which is characterized in that the sidewalls of said structure (1) comprise, over at least a portion of the length of the cylinder, an acoustic deflection means (2) comprising, on each side of the thick hull, cladding members (2) having a V-shaped cross-section, which lie flat against the hull (1) and which are combined with said hull via a shock-absorbing and noise-damping means (6).
