Abstract (en)
[origin: WO2013184078A1] The present invention relates to a draining system for use in sanitary installation products (19) such as basins, bathtubs and the like. It comprises a hidden overflow system to save space. In the draining system the plug (7) for collecting water in the sanitary installation is positioned above a waste water outlet (18) for the sewage coming from the basin, which outlet may be positioned in a wall. Directly above the plug (7) is the hidden overflow system (1) comprising an inner (1a) and an outer (1b) duct, wherein upon closing the plug (7) the water in parallel to the basin rises in the inner duct (1a) and, to prevent overflow, upon reaching a predetermined height is directed to the outer duct (1b) which leads directly to the waste water outlet (18).
