Abstract (en)

[origin: WO2013182342A1] The invention relates to a capacitive sensor arrangement (1) having at least one capacitive sensor (2) and a coating (3) applied to a front side of the at least one capacitive sensor (2). According to the invention, the coating (3) comprises a multiple layer structure, which is formed from a plurality of capacitive layers (3.1 to 3.n), which are arranged in plies and electrically connected in series. The invention further relates to a touch-sensitive screen (4), comprising at least one such capacitive sensor arrangement (1).
