Abstract (en)
[origin: EP2860023A1] A machine for the double notching of a stack of paper sheets to coat boxes, in which the main notchings are performed by means of two descending main cutting assemblies (1, 2), each comprising a front blade (11, 21) and a side blade (12, 22), both movable and cooperating with a front lower counter-blade (13, 23) and a side lower counter-blade (14, 24) respectively, the position of said blades and counter-blades being adjustable on the working surface, the machine comprising at least one secondary cutting assembly (8) connected above to translational means that press it above said stack of sheets to perform a secondary notching.
