Abstract (en)

The present invention relates to a fog-generating device comprising: a propellant gas (1); a reservoir (4) comprising a movable wall (2) and a fog-generating material (3); and a heat exchanger(9) ; wherein said propellant gas (1) drives said movable wall (2) to expel the fog-generating material (3) from the reservoir (4) to the heat exchanger (9). The present invention also provides a removable housing (6) for such a device.
