Abstract (en)  
[origin: WO2013190565A2] Earth and Environment is facing serious hazard due to the rapid production & accumulation of Assorted Waste & Plastics (AWP), containing wastes primarily from used cars, tyres, plastics, MSW, households Industry & many others. The present methods of re-cycling or disposal are costly & inadequate. In the Process of TRAWP invention, after treatment or/ & detoxification, the AWP are reused fully as a raw material in manufacturing & construction activity (indoor & outdoors). An Assorted Waste & Plastics (AWP) Board/panel/brick/slab adapted to treat a bulk AWP material for sustainable environmental reutilization is disclosed. The Board/panel/brick/slab comprises a first part and a second part such that the first part is sequentially filled with a binder/filler. material followed by filling with a AWP material. The second part is securely coupled to the first part to form the AWP Board/panel/brick/slab. A process for preparation of Assorted Waste & Plastics (AWP) Board/panel/brick/slab is also disclosed.
