Abstract (en)
[origin: WO2013182782A1] Annular part of a turbo machine stator comprising a structural support (10) provided successively with a keying sub-layer (12) and with an abradable coating (14) formed of a resin filled with microbeads, the keying sub-layer ensuring that the abradable coating attaches to the structural support being formed of a long-fibre fibrous ply a peripheral part (12A, 12B) of which is secured to the structural support and a central part (12C) of which is embedded in the microbead-filled resin when the abradable coating is fixed to the structural support.
