Abstract (en)
[origin: WO2013186133A1] The invention relates to a filter element (10) for a household vapour extraction hood, with a filter frame (12), a first filter stage (18) and a second filter stage (32) arranged between the first filter stage (18) and an upper, clean-air side (14) of the filter frame, wherein the first filter stage (18) is constructed in the form of an eddy current filter and the second filter stage (32) is in the form of a stretched metal filter, and the two stages are jointly received in the filter frame (12).
