Abstract (en)
[origin: WO2013186132A1] A refrigeration appliance, particularly a household refrigeration appliance, has a storage space (4) for cooled material (23), wherein at least one passage (13) for the flow of air into and out of the storage space (4) is formed in a wall delimiting the storage space (4). The passage (13) can be closed by a movable closure element (14). A fan (17) for driving an air flow is arranged in the storage space (4) and can be operated with the passage (13) closed.
