Abstract (en)

[origin: WO2013186356A1] A motorized furniture drive assembly (10) comprises at least one motorized furniture drive (3); at least one drive control device having a receiving device for wireless radio transmission; and at least one communication device (4) for operating the furniture drive (3). The motorized furniture drive assembly (10) is provided with at least one communication adaptation device (5), which is designed to communicate with the at least one communication device (4) by means of a primary wireless transmission path and to communicate with the at least one receiving device by means of a secondary wireless transmission path. An assembly comprises the motorized furniture drive assembly (10) and a piece of furniture (1).
