Abstract (en)
[origin: WO2013189633A1] The invention relates to a method for supporting a driver of a first motor vehicle, comprising the following steps: scanning an environment of the first motor vehicle; determining an action instruction to the driver of the first motor vehicle in order to avoid hindrance of a second motor vehicle with special authorization; aligning the action instruction with additional motor vehicles in the area of the first motor vehicle; and outputting the action instruction to the driver of the first motor vehicle.
