Abstract (en)

[origin: CN104544557A] The invention discloses a method for transmitting the rod-shaped products of the tobacco processing industry. The method comprises steps of acquiring the lengths of the rod-shaped products before cutting the rod-shaped product into the finished goods, calibrating the positions of rod-shaped products on one-by-one basis through an activatable or activated cutting position calibration device, or acquiring the corresponding position of the rod-shaped product on the conveying device before the rod-shaped product is cut into the finished goods, calibrating the rod-shaped product respectively or individually on the conveying device relative to the cutting position through a preference activatable or activated cutting position calibration device. Furthermore, the invention also discloses a conveying cylinder in the tobacco processing industry and a machine of the tobacco processing machine, particularly the
