Abstract (en)
[origin: EP2862470A1] The present invention is a wallet made of a silicone resin, comprising: a pair of flat portions facing each other; a bottom portion connected to a bottom edge of each flat portion; a pair of side portions connected to right and left edges of the flat portions; and a partition portion for dividing a space formed from the flat portions, the bottom portion, and the side portions, wherein at least the flat portions, the bottom portion, the side portions, and the partition portion are integrally molded.
