Abstract (en)

[origin: WO2013160624A1] The invention relates to a method for transforming a polyamide thermoplastic polymer, which includes: a step of extruding the polymer in the presence of supercritical CO₂, in which the weight ratio of CO₂SC relative to the polymer during the extrusion step is 25 wt % to 500 wt %; and a step of comminuting the extruded polymer and recovering the polymer in particle form.
