Abstract (en)
[origin: WO2014004274A1] Dual-wet-clutch (8, 9) transmission (3) for a vehicle gearbox, said dual-clutch (8, 9) transmission (3) being coupled to a drive shaft (12) and being able to receive the torque from the drive shaft (12), also including: a hydraulic circuit fed by a pump (20) supplying the pressurized fluid; means for controlling the movement of the clutches (8, 9), belonging to the hydraulic circuit. The means for controlling the movement of the clutches (8, 9) include a proportional flow rate valve (14, 15) for each clutch (8, 9) providing at the output (S1) a hydraulic pressure injected into the clutch (8, 9) against a return force exerted on the clutch (8, 9) by spring means (27, 28), said proportional flow rate valve (14, 15) being closed-loop controlled to adjust the pressure in the output (S1).
