Abstract (en)
  [origin: WO2013192564A2] The disclosure includes a system and method for automatically authorizing data transfer from a third party service to a user device. The system includes a processor and a memory storing instructions that, when executed, cause the system to: receive a request for data from a user of a user device; receive information associated with the user and information associated with the user device; determine whether the user has previously provided authorization for a particular application available on the third party site; determine whether the user has previously provided authorization for the user device; and if the user has previously provided authorization for a particular application available on the third party site or has previously provided authorization for the user device, send data to the user device.
