Abstract (en)
The invention provides a merchandise display unit and a merchandise display assembly comprising a plurality of the merchandise display units. The merchandise display unit comprises: a first support member; a second support member spaced from said first support member; a first lateral support member configured for location with respect to said first and second support members to extend transversely therebetween, said first lateral support member configured for releasable coupling, at a first end thereof, to a first end of said first support member and, at a second end thereof, to a first end of said second support member; a second lateral support member configured for location with respect to said first and second support members to extend transversely therebetween, said second lateral support member configured for releasable coupling, at a first end thereof, to a second end of said first support member and, at a second end thereof, to a second end of said second support member; a panel configured for location in a space defined between said first and second support members and said first and second lateral support members, wherein said panel is configured for releasable coupling, at a first edge thereof, to said first lateral support member and, at a second opposite edge thereof, to said second lateral support member.
