Abstract (en)

According to the present invention, a flexible container for non-intertwined wet wipes is provided, which has a substantially rectangular shape comprised by a top face (5), a bottom face (5a) and side faces (6), which short ends (2) are sealed; the container has a dispensing opening (11) which is formed by detaching a detaching area (4) which is delimited by a perforation (3), and a flexible seal arranged for tightly sealing the container once it has been opened. The dispensing opening (11) is formed by a slot starting at a point located at the top face of the flexible container and projected towards one of the side faces thereof, defining a top portion (7) and a bottom portion (8) of the dispensing opening (11), through which the finger may be introduced so as to pull outside the wet wipe located at the top part of the stack, without dragging the next wipe.
