Abstract (en)

[origin: WO2014001502A1] A combination made up of a small vacuum cleaner (1), which comprises a dust collector (10), a fan for generating a suction-air stream through the dust collector (10), and an electric motor (25) for driving the fan, and of an upright-vacuum-cleaner frame (40), wherein the small vacuum cleaner (1) can be connected to the upright-vacuum-cleaner frame (40) to form a unit which can be operated as an upright vacuum cleaner, and wherein the upright-vacuum-cleaner frame (40) comprises a casing body (41), into which the small vacuum cleaner (1) can be inserted. The invention also relates to such a small vacuum cleaner and to a correspondingly designed upright-vacuum-cleaner frame. This makes it possible to improve the handling as a small vacuum cleaner and/or as an upright vacuum cleaner and/or to simplify the measures necessary for connecting the small vacuum cleaner to the upright-vacuum-cleaner frame for operation as an upright vacuum cleaner.
