Abstract (en)
[origin: WO2013132280A1] Massage table comprising a headrest (1) and a massage bed (2). The headrest (1) comprises a base plate (3) and a head support (4). The head support comprises a bolster (5) and a supporting plate (6). A rotating element (8) connects the base plate to a supporting element (7) coupled to massage bed. The angle between the plane of the headrest and the plane of the massage bed is adjustable. Between base plate and head support transmission means (9), between supporting plate and supporting element at least one moving rod (10), between base plate and supporting element an adjusting rod (1 1) is coupled. In another embodiment an intermediate plate (14) is placed between base plate and head support making supporting plate movable parallel with the longitudinal axis of the massage bed. Between intermediate plate and base plate and between intermediate plate and head support transmission means (9) are installed.
