Abstract (en)

[origin: CA2877966A1] Toy (1') comprising a casing (2, 3) having at least one viewing opening (9, 9') and one rotating body (10) arranged in the casing (2, 3) and rotatably mounted within said casing, wherein said body is designed with an imbalance (16, 17) and provided with at least two different markings that can be seen through the viewing opening (9, 9') and in the viewing area. The casing (2, 3) is designed substantially cylindrically with an upper side and a lower side, the diameter of said upper side and lower side being greater than the height of the casing (2, 3), and in particular such that the casing (2, 3) has a disc-shaped design with the proportions of an ice hockey puck.
