Abstract (en)  
[origin: WO2014005823A1] In a method for providing a substrate (S) with an imprint, in which fluidic printing ink is first printed onto a strip (B) and is at least partially dried there, and in which the at least partially dried printing ink is transferred from the strip (B) onto the substrate (S), a transfer coating, in particular a decorative transfer coating (F), is also applied to the substrate (S) in addition to the printing ink. The transfer coating (F) in particular can also be first applied to the strip (B) and transferred from the strip (B) onto the substrate (S). Printing ink can be provided on the strip (B) next to and also underneath or over the transfer coating (F).
