Abstract (en)

[origin: DE102012012937B3] The package has an opening region (1) formed with a tearing line (2) and a hinge (3) formed in the portion of the opening region. The hinge is provided for rotating into the package interior. The tearing line is formed with circular portion and a portion formed between the circular portion and the hinge. A cutting element is provided for tearing the tearing line. A screw cap is provided for closing the opening of the package (P).
