Abstract (en)
[origin: US2014001072A1] A storing and dispensing container for product. The container includes a flexible pouch for storing product. A flip top, having a lid connected to a flange by a hinge, is affixed to an outer surface of the pouch at the top portion of the pouch. The flange surrounds an interior region. The interior region includes a removable portion which can be removed to reveal a dispensing orifice. The interior region defines an interior region area. The removable portion area is no greater than 80% of the interior region area, and the removable portion abuts the flange at a tear apex.
