Abstract (en)
[origin: EP2868567A1] Provided is an oil loading apparatus which is connected to a supply pipe and loads oil in a storage tank. The oil loading apparatus includes: a loading pipe which is connected to the supply pipe and disposed in a vertical direction in the inside of the storage tank; and a pressure drop module which is connected to a lower end of the loading pipe and induces a pressure drop of the oil discharged from the loading pipe, wherein the pressure drop module includes: a pressure drop pipe which is connected to the lower end of the loading pipe; multi-hole orifices which are disposed in a transverse direction in an inside of the pressure drop pipe; and a T-shaped branch pipe which includes a vertical pipe and a horizontal pipe.
