Abstract (en)

The present invention relates to a centrifugal pump and a method of pumping a medium. The present invention relates especially to a centrifugal pump having a novel impeller - volute casing construction where the working vanes (136) of the impeller (130) extend into the cavity (116) formed in the volute casing (110). The centrifugal pump and the method of the present invention are especially suitable for pumping fibrous paper or board making suspensions.
