Abstract (en)
[origin: EP2868983A1] The present invention provides an improved range hood. The range hood provided in the present invention includes a double-inlet blower system and a double-inlet housing, and the double-inlet blower system is disposed in the double-inlet housing; the double-inlet blower system includes a first air inlet and a second air inlet disposed back-to-back; the double-inlet housing includes a first inlet portion and a second inlet portion disposed back-to-back; and the first air inlet and the first inlet portion are disposed opposite to each other, and the second air inlet and the second inlet portion are disposed opposite to each other. In this way, air flows more smoothly, and the air intake efficiency of the double-inlet blower system can be improved.
