Abstract (en)  
[origin: WO2014009052A1] The invention proceeds from a cutting-depth limiting device for portable power tools, having at least one cutting-depth guide unit (14) and having at least one stop unit (16) which has at least one movably mounted stop element (18) and at least one fixing element (20) for fixing the stop element (18) in at least one position. It is proposed that the stop unit (16) comprises at least one pre-positioning element (22) which subjects the fixing element (20) in at least one state to a force in the direction of a releasing position of the fixing element (20).
