Abstract (en)

[origin: WO2014006305A1] The invention relates to an air-conditioner for a motor vehicle, said air-conditioner (4) including an air-outlet opening (33) surrounded by a first rim on which an axial-compression sealing gasket (10) is to be arranged. The first rim comprises a first bearing strip (12) which is substantially planar or which can be developed as portions of planar strips. A circumferential assembly groove (8), enabling a first rib (6) of a complementary duct (5) of the air-outlet opening (33) to be axially inserted therein, extends through the bearing strip (12).
