Abstract (en)  
[origin: WO2014005824A1] The invention relates to a lever system for actuating at least one clutch, comprising at least one pivotable lever that has a certain bending stiffness. The invention is characterized in that the lever (4, 44) has at least one flexurally elastic zone (14, 24, 34) which is designed and/or arranged in such a way that the bending stiffness of the lever varies in accordance with an actuation path (12) of the clutch.
