Abstract (en)

[origin: EP2870900A2] A merchandising system (10) for displaying a plurality of products is disclosed. The system includes a base (200) and a proximal member (500). The base (200) includes a product-supporting surface which defines a longitudinal axis. The proximal member (500) is disposed in mechanical cooperation with a proximal portion (202) of the base (200). The proximal member (500) includes an arcuate portion (510) extending between a first lateral side (512) and a second lateral side (514) of the proximal member (500). The proximal member (500) includes a scalloped portion (520) extending from an upper portion of the proximal member toward a lower portion of the proximal member (500).
