Abstract (en)

[origin: WO2014013150A1] The invention relates to a wig system (P) comprising a temperature control accessory (A) configured to be arranged under said wig when same is placed on the wearer's scalp, and in which: the wig (P) includes a body (1) defined by a perimeter (10) and having a shape that matches the shape of the skull of the wearer, hair being affixed to said body, the accessory (A) being installed between said body and said scalp; the control accessory (A) is in the form of a flexible skull cap (2) defined by a perimeter (20) having a shape that matches the shape of the skull of the wearer; the skull cap (2) is detachable from the body (1) of the wig (P), said skull cap including an inner surface which comes in contact with the skull of the wearer and an outer surface opposite said inner surface, characterized by the fact that: the perimeter (20) of the skull cap (2) is smaller than that of the body (1) of the wig (P), at least the inner surface of the skull cap (2) is produced from an absorbent material intended to be humidified before said skull cap is placed on said scalp, and at least the outer surface of the skull cap (2) is skin colored.
