Abstract (en)

[origin: WO2014008520A1] The present invention relates to a lockable ejection device (1) for a movable furniture part (2), having an ejection element (3) acting on the movable furniture part (2) in an opening direction (OR), a housing (4) and a locking element (5) arranged in or on the housing (4), by means of which locking element, at least in the closing direction (SS) of the movable furniture part (2) the path of the ejection element (3) in the opening direction (OR) can be blocked, wherein, both when excess pressure is applied to the movable furniture part (2) from a closed position (SS) in the closing direction (SR) and when the movable furniture part (2) is pulled from the closed position (S) in the opening direction (OR), the ejection element (3) can be released by the locking element (5), wherein, both when excess pressure is applied to the movable furniture part (2) and when the movable furniture part (2) is being pulled, the ejection element (3) can be unlocked by a movement of the locking element (5) relative to the housing (4).
