Abstract (en)
[origin: WO2014009147A1] The invention relates to a desk-seat device comprising a base frame (2) which has a pedestal cross (20), and a seat structure (3) which has a seat surface (30) and a backrest (31), a pivoting mechanism (4, 104, 204) being provided by means of which the seat structure (3) is mounted on the base frame (2) so as to be pivotable about a horizontal pivot axis (I) between a working position and a lying position, and the pivot axis (I) being arranged relative to the base frame (2) stationarily above the seat surface (30) at least approximately in the region of a centre of gravity of the seat structure (3) including a person using the seat structure (3) properly.
