Abstract (en)
[origin: WO2014014344A1] The present invention relates to a marine winch assembly, comprising a supporting rail, a carriage movably supported on said supporting rail, a cable drum having a longitudinal axis, parallel to the supporting rail, which is rotatably supported on said carriage, a first drive unit supported by the carriage for rotating the cable drum and a second drive unit for moving the carriage relative to the supporting rail to displace the cable drum along the supporting rail. According to the present invention, the supporting rail extends through the carriage and through the cable drum.
