Abstract (en)

[origin: WO2014012806A1] The invention relates to a method for displaying parameters of a cooking process, in which an information window (20) within an indicating window (12) temporarily displays an intelligent cooking system used during the cooking process. The invention also relates to a cooking appliance display device (10) which displays various parameters and steps of a cooking process and makes the same accessible to a user for interaction, in particular with the help of the method according to one of the preceding claims. Said display device is characterized in that an information window (20) is provided in which a currently used intelligent cooking system is displayed.
