Abstract (en)

[origin: WO2014009979A1] An anti-theft system is described with mechanic and electronic protection of products, composed of: at least one sensor- and product-carrier device (100) adapted to mechanically protect a product and to transmit alarm signals in case of attempt of theft; at least one cable-winding element (300) adapted to receive the transmitted alarm signals; at least one cable (200), preferably made of steel, that connects the sensor- and product-carrier device (100) to the cable-winding element (300) and that is adapted to be unwound and wound in such element (300); and at least one external power supply (400) operatively connected to the cable-winding element (300).
