Abstract (en)

[origin: WO2014009491A1] Edge connector for a photovoltaic solar module having: a dielectric edge connector housing with a lateral mounting tab for attachment to an end-face edge of the solar module; a first cable connector disposed laterally on the edge connector housing for releasable attachment of a first attachment line to the edge connector in order to produce an electrical connection of the attachment line to the solar module; a second cable connector, which is electrically connected to the first cable connector and is disposed on the edge connector housing opposite to the first cable connector, for attachment of an edge connector line limited to the solar module; and a conductor strip attachment element, which is electrically connected to the cable connectors and is disposed between the cable connectors of the edge connector, for electrical connection to a conductor strip.
