Abstract (en)
[origin: EP2687458A1] The packaging structure (1) has an upper packaging element (3) and lower packaging elements (4) that are interconnected with each other by a circumferential sealing surface and/or sealing seam (5). The cavity (6) is formed for receiving the film (2). The case section (7) is formed in upper packaging element and the case section (8) in the lower packaging element by crossing a folding or bending line (10), such that the terminal points (15,16) of sections are placed at a distance (M1) from the cavity corresponding to the width (M2) of the sealing seam.
