Abstract (en)

[origin: WO2014012786A1] The invention relates to a thermally insulated tumble drier (1) comprising a rotatably mounted drum (3) for accepting the objects to be dried, a control device (10), a process air duct (2), a heating element (4), and at least one end shield (7) for mounting the drum (3), said at least one end shield (7) being provided with thermal end shield insulation (20, 26). The invention further relates to an end shield (7) for mounting a drum (3) in a tumble drier (1), said end shield (7) being provided with thermal end shield insulation (20).
