Abstract (en)
[origin: WO2014012814A1] The invention relates to an installation for the treatment of a fibrous material suspension (1) containing security fibers (2), which is fed from a sorting device (6) to a sheet-forming unit (4) having an overflow (3). According to the invention, a loss of security fibers (2) should be prevented by feeding the overflow (3) of the sheet-forming unit (4) into a standpipe (5), which is arranged between the sorting device (6) and the sheet-forming unit (4), and by adding the security fibers (2) to the fibrous material suspension (1) only after the sorting device (6).
