Abstract (en)
[origin: WO2014012681A1] The invention relates to an anchoring system for wall formwork as well as to a method for suspending said anchoring system on the rear side of wall formwork as the wall formwork is disassembled. In order to speed up disassembly, an anchoring system comprising an anchoring rod (4) and at least one releasable locking device is provided. The part of the anchoring system that is withdrawn from wall framework once a concrete wall has been erected comprises a suspension mechanism for suspending the withdrawn part of the anchoring system on wall formwork.
