Abstract (en)

[origin: WO2014012533A1] The invention relates to a weapons platform comprising a directable weapon (13) and a tie-down device (16) for securing the weapon (13), which tie-down device (16) can be transferred from a tie-down position, in which the weapon (13) is secured by said tie-down device (16) into a supporting position, in which the tie-down device (16) forms a support for the weapons platform (10) in relation to the ground beneath. The invention further relates to a military vehicle comprising a weapons platform (10) that has a directable weapon (13), said platform comprising a tie-down device (16) for securing the weapon (13). The tie-down device (16) can be transferred from a tie-down position, in which the weapon (13) is secured by the tie-down device, into a supporting position, in which the tie-down device (16) forms a support for the vehicle (1) in relation to the ground beneath.
