Abstract (en)
An apparatus for printing on a print support comprises a print head (13), for printing a print material on the print support, a feed device (11) and a recirculating unit (15) of the print material. The recirculating unit (15) comprises a first container (14), a second container (18), a first recirculating device (16) configured to generate a first stream of said print material from said first container (14) toward said print head (13) and said second container (18), and a second recirculating device (17) provided to transfer the print material from the second container (18) to the first container (14).
