Abstract (en)

[origin: CN104648728A] The invention relates to a deflection device for a film hose and control device for a deflection device. In the deflection device for a folded film hose 1, the deflection device is so structure that allows the folded film hose 1 to rotate about the longitudinal axis 10 of an expanding mandrel 9 at a certain angle, and the longitudinal axis of the folded film hose is oriented at the direction of the longitudinal axis of the expanding mandrel 9.
