Abstract (en)
A refrigerator comprising at least one shelf (1) to which is associated a bottle support (5) for objects such as a bottle and/or an additional shelf, particularly an additional removable shelf, said support comprising a movable and foldable structure having at least one pair of elongated portions (7) preferably provided with undulated portions, said elongated portions (7) capable of being arranged in a first working position beneath the shelf (1) so as to accommodate at least one object, in particular a bottle (6) and/or an additional shelf, said elongated portions (7) being capable of assuming at least one second working position or folded position near said shelf (1), said elongated portions (7) being secured at their opposing ends (9, 10) to pairs of arms (11, 12) hinged to a corresponding support (14) integral with the shelf (1). The arms (11, 12) of each pair of arms are arranged so as to cross over each other and form, with said undulated portions (7), a movable scissor-action structure. A support for at least a bottle and/or for at least an additional shelf that can be applied to a shelf, in particular an upper located shelf of a refrigerator, is also claimed.
