Abstract (en)

[origin: WO2014016138A1] According to one embodiment, the invention relates to a method for producing at least one synchronous ring (150), which comprises providing a pre-turned blank (100) made of a curable material, wherein the blank (100) is provided in an uncured state, and laser cutting the provided blank, in order to provide at least a form of the at least one synchronous ring (150). In this way it may be possible to create a simpler method for producing a synchronous ring (150).
