Abstract (en)

[origin: WO2014015871A1] The invention relates to a gearshift dome (1) for a change-speed gearbox of a motor vehicle. The gearshift dome (10) comprises a housing (3) which can be placed on the change-speed gearbox and in which a selector lever (6) is mounted such that it can rotate about an axis of rotation (7). In order to avoid the transmission of vibrations, a preloading means (24) is provided to preload the selector lever (6) against the housing (3).
